Precipitation probability							
00%	00%	00%	00%	00%	40%	80%	80%

Forecast for Monday 09 May 2022

Weather: Dry with some early spells of sunshine, but increasing high cloud making any sunshine rather hazy. From mid-afternoon onwards cloud will lower to cover many summits, with outbreaks of rain spreading form the west late afternoon onwards. The rain will become persistent during the evening, with some heavy bursts possible in places and with the wind strengthening to gust to gale force over the summits.

Chance of cloud-free hill tops above 800m: 90% or better at first deteriorating to 40% mid-afternoon and 10% or less during the evening.

Low Cloud and visibility: Isolated patches of cloud on some valley slopes near 400m at first otherwise cloud holding clear of the summits during the morning with generally good visibility. Cloud becoming broken above 500-600m during the afternoon, and lowering closer to 400m in any heavier rain in the evening. Visibility falling to a few km or less in rain.

Meteorologist's View

Winds will strengthen through the day, with gusts to gale force over exposed ridgelines and the summits likely by evening. Feeling cold in the wind on the higher routes.

Forecast for Tuesday 10 May 2022

Weather: Spells of rain during the early hours will ease and clear before dawn, with much of Tuesday morning dry with bright spells. Scattered showers will develop in the afternoon, with the odd heavy one possible before they gradually ease during the evening.

Maximum wind: Southwesterly 35-40mph gusts 50mph.

Chance of cloud-free hill tops above 800m: 10% or less in rain at first, improving to 70% as the rain clears.

Low Cloud and visibility: Extensive low cloud covering slopes above 400m during the early hours will lift and break to scattered cloud bas 800-900m as the rain clears. Cloud will increase and lower to broken amounts nearer 700m in any showers. Visibility generally a few km at best in early rain, but improving to be generally good beneath cloud once the rain clears, with only brief deteriorations in showers.

Temperature: **Valleys:** Plus 8 Celsius becoming Plus 15 Celsius.
At 800m: Plus 8 Celsius becoming plus 6 Celsius.
Freezing level: Above the summits.
